

PEDCO[®]

SPECIALISED STEEL SOLUTIONS

INNOVATIVE SOLUTIONS

Our customers have unique forming and metal fabrication needs. Our innovative minds and technical knowledge help us think outside the box. We develop a deep understanding of our customers' needs and are able to craft perfectly customised products to solve some of the most complex challenges. From custom tooling to custom design...

**IF THERE'S A SOLUTION,
WE'LL FIND IT.**

RELIABILITY AND PRECISION

We understand time is money, and getting it right the first time is critical to your business. Behind every Pedco job is our highly skilled team of estimators, operators and fabricators. Our in-house project management system with quality control processes supports us to consistently meet, and regularly exceed customer expectations. Our powerful line up of machinery, global ISO standards and attention to detail mean our customers benefit from competitive lead times and the peace of mind that our obsession is...

**TO GET IT RIGHT,
THE FIRST TIME.**

INDUSTRY EXPERTISE

With over 35 years' experience, we have built a reputation as an industry leader in the pressing, rolling, welding and fabrication of steel. Our expertise goes beyond the state-of-the-art factory floor and machinery. We employ and develop some of the best people in the industry, which mean our customers are in good hands. Our technical knowledge and commercial experience means we have the capability to...

DELIVER COMPLEX PROJECTS RELIABLY AND CONSISTENTLY.

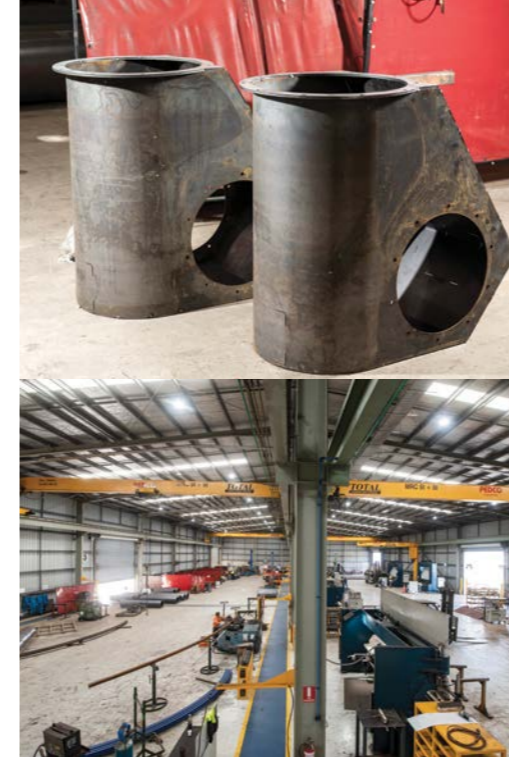

PRESSING

Our pressing services can provide quality results with a quick turnaround. We can bend various material thicknesses in a variety of metals, including mild steel, stainless steel, titanium, bisalloy & aluminium. We are also experienced with Inconel and hard-faced plate. We specialise in eccentric and conical reducers.

ROLLING

We can process an extensive range of rolling applications on various materials & thicknesses. Our technologically advanced machinery with programmable settings means we can guarantee finished products within precise tolerances every time. We specialise in cylinders but can also offer plate straightening services along with section rolling.

FABRICATION

Our fabrication team can produce a wide range of fabricated components and end products to the highest standards. We have CAD services available, and our estimators can assist with the design of any of your job needs. We are specialists in medium to heavy steel items including but not limited to tanks, trays, chutes, cylinders & buckets.

WELDING

With our experienced welders, we can offer a variety of welding solutions from GMAW, SMAW, GTAW, SAW & FCAW with qualifications of AS/NZ 1554.1SP, 1554.5, 1554.6, AS/NZ 2980, AS/NZ 3992, AWS D1.1, AS ISO 9606.1 as standard. Other weld procedures, MDR's & customised ITP's can be provided to cater for your individual requirements plus weld testing such as MPI, UT, DPT and Radiographs can be organised as per your instructions.

OTHER SERVICES

We can provide a range of additional services to our meet our clients requirements. This enables us to take your project from design right through to finished product. Additional services include, cutting, bevelling, drilling, punching, powder coating testing and certifications. We provide project management services. Contact us for further information on our wide range of services we have available.

OUR INDUSTRIES

We partner with an array of WA's major industries, ensuring our clients' success by delivering the highest quality made-to-order steel products. We understand the unique challenges of each industry and take pride in the...

**SUCCESSFUL MANAGEMENT
OF COMPLEX PROJECTS.**

OIL, GAS & ENERGY

Our clients recognise the value in partnering with a fabricator that meets the needs of their intricate industry. By achieving a high level of quality, meeting schedules and understanding the unique challenges of their industry. We take pride in our successful management of complex projects, harsh environments, and tight timelines, to ensure the supply chain is not interrupted.

MINING & MINERALS

Projects in remote locations have a critical need for work to be done right, the first time. We ensure our clients success by delivering the highest quality made-to-order steel products. As a major supplier to the Australian mining industry, we supply a range of customised products, including pulley shells, bent tube, pipe sections, safety rails, and components for mining equipment and vehicles. We are also able to assist our clients with the refurbishment of equipment.

INDUSTRIAL SERVICES

Our experience with some of Australia's largest heavy industry organisations gives us the capability to provide integrated solutions across a variety of applications. Knowledgeable within the areas surrounding the agriculture, chemical and environmental industry demands, we can adapt to your unique constraints.

INFRASTRUCTURE SERVICES

Through our innovative techniques and use of superior metal fabrication machinery, we can deliver custom-made single items as well as large-scale production runs. Every project is manufactured precisely to your exact specifications, meets our strict quality standards and is delivered on time. We have undertaken projects across the energy infrastructure, construction, telecommunication and transportation industries.

DEFENCE

We are an upcoming solutions provider to the Defence Industry. We can offer a range of specialised plate products to support the manufacturing of sub-assemblies and components for the army, navy and air force. We have the capabilities to take on the extended requirements of Defence contracts

PARTNERSHIP

We believe that good relationships are the foundation of any successful supplier relationship. Providing amazing service to our customer is our #1 priority, which is why we go above and beyond to deliver what you need, when you need it. We are open, transparent and proactive in our communication, and provide support every step of the way throughout your project...

WHICH MEANS YOU CAN FOCUS ON YOUR BUSINESS.
