

PEDCO ENGINEERING

COMPANY / CAPABILITY OVERVIEW

Pedco Engineering is a specialised steel forming and fabrication business that has been operating since 1987. From small components to large structures. Pedco Engineering can do it all with a focus on customised metal solutions for significant capital projects and in support of operations and maintenance requirements.

Pedco capabilities include bending, rolling, pressing, sub-arc welding and fabrication. From small parts up to large structures and in a variety of materials from grade 250 steel and aluminium to exotic materials such as Super Duplex, Stainless Steels, Titanium, Tungsten to Bisalloy, Hastelloy and Ballistic Plate as well as quenched & tempered steels and hard-faced metals.

Whatever the steel grade Pedco has the solution using our domain knowledge alongside our technical skills and know-how within steel forming and fabrication.

CAPABILITY

- Metal Forming and Fabrication
- Parts Manufacture
- Switchboard Enclosures
- Pressure Vessels
- SubArc Welding
- Pipe Fabrication

COMPETITIVE DISCRIMINATORS

Pedco Engineering unlike competitors in steel forming, has in house Engineering and Project Management to manage the larger projects to customers expectations of on time and on budget.

Our processes and procedures have been and are continuing to be developed to meet the Prime Contractors requirements to meet Defence expectations.

Most steel forming companies only press and roll. Whilst most fabrication workshops outsource the forming.

With Pedco Engineering's in house capabilities we can manage the provision of a wide range of turnkey products and solutions from start to delivery.

CERTIFICATIONS / ACCREDITATIONS

ISO 9001 Accredited

Member of the Henderson Alliance

PARTNERS & CUSTOMERS

- | | |
|--------------|--|
| • BRE | Start Air Flasks for OPV |
| • South 32 | Bauxite Chute – Includes Bisalloy Wear Plates |
| • Liebherr | Front end loader and rock breaker parts for Mine Sites |
| • Civmec | Ladders, testing stations and general fabrication |
| • Downer EDI | Various fabrication and forming works |
| • Dwyer | Super Duplex & 310 SS Tanks |
